

#YouCanCare

Regardless of **age, gender** or **background**, if you have a kind heart, then **#YouCanCare** too!

Live in Care Case Study.

There are a lot of benefits to live in care as opposed to community care. The first is that you get to build a really good relationship to the Client and get to know the families too. There are no time restraints on the call. The Clients are usually much happier as the CAREGiver isn't rushing in and out to get to another call. The second is consistency in the care they receive, you get to know their routine and have more time to socialise. There is of course, also a financial gain to be had as your not using so much fuel and there is a lot less wear and tear on your vehicle, there's also the element of more pay. Living in is a good way to go if your responsibilities at home allow. Give it a go, you never know, you might enjoy it!
